

## Pair the Amwell app to your Tyto Device

For your Tyto Device to communicate with the Amwell app, you need to pair it. You will use your home Wi-Fi or other Wi-Fi whenever using the Tyto device with Amwell, so please make sure the smartphone or tablet you are using is connected to your home Wi-Fi and that you are in a location where the signal is strong (e.g., close to the router).

## Please have your home Wi-Fi password available as you will need it to complete the pairing process.

It is always preferred that you use your home Wi-Fi Internet connection when using the Tyto device, but if you need a backup or if you are traveling, you may use your smartphone as a hotspot Internet connection.

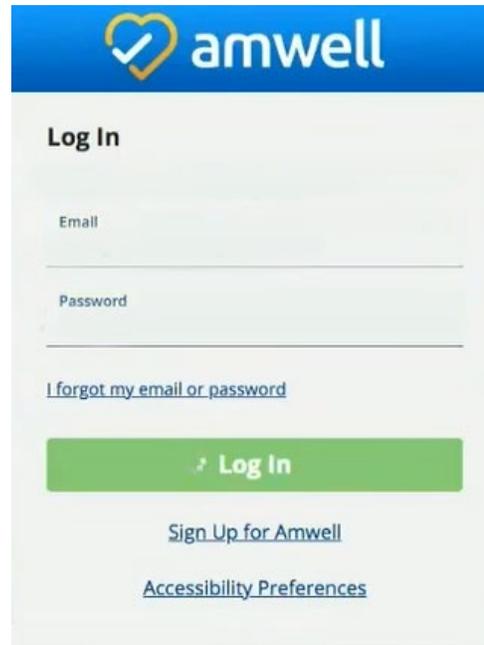

### Step 1

Download the Amwell Doctor's Visit 24/7

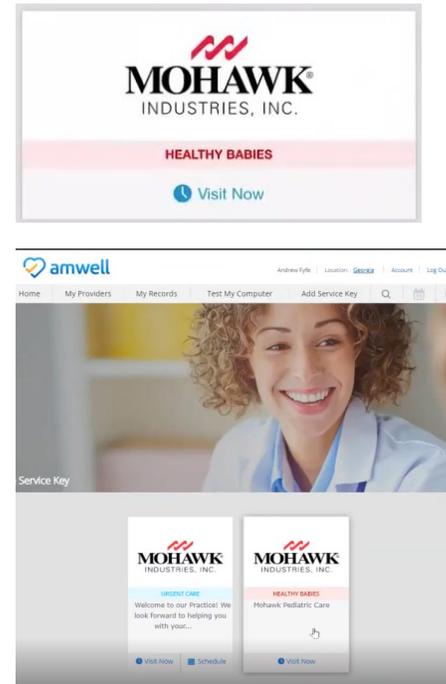

### Step 2

Log into the Amwell app.  
Set up account if haven't already  
Amwell will try to set up account if we have an email to share with them.

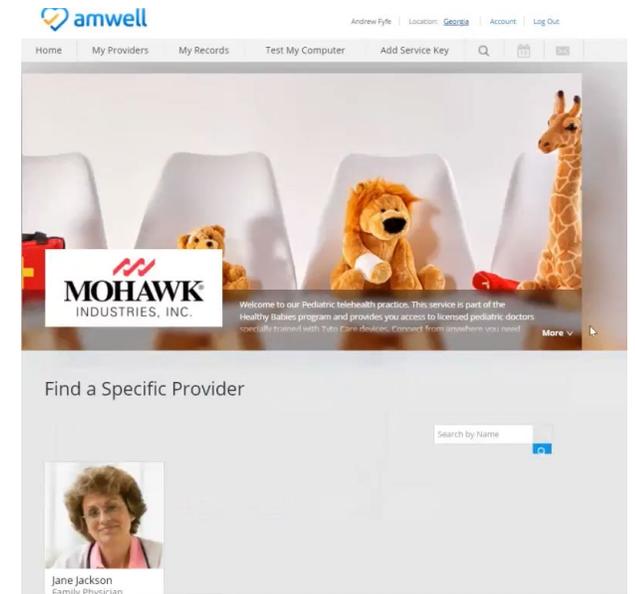

### Step 3

Select Mohawk Pediatric Practice

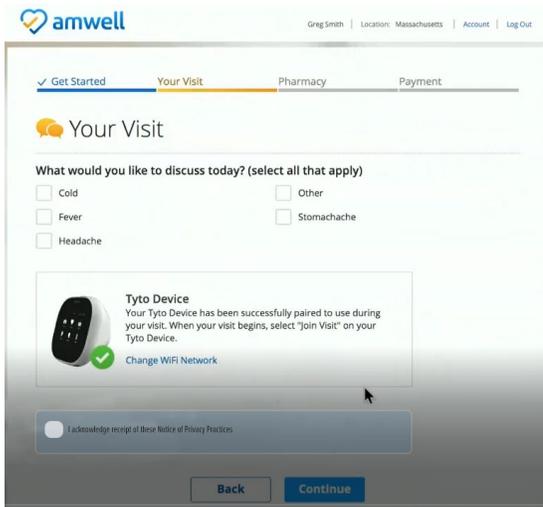

### Step 4

Select physician.  
List would be pediatricians only for this practice.

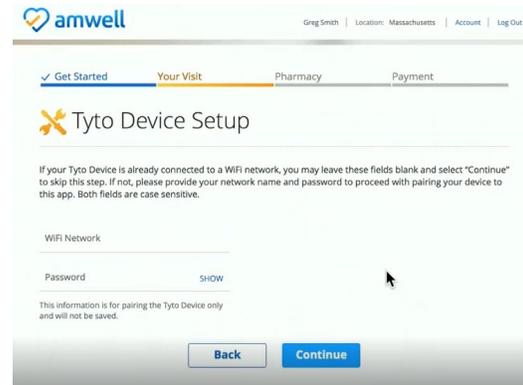

## Step 5

Check the reason for visit and start pairing process. Please make sure the Tyto device is turned on.

## Step 6

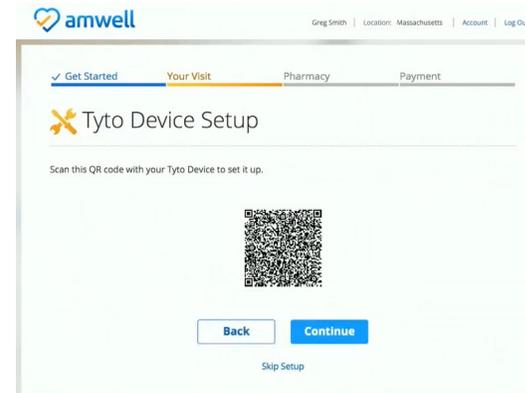

Enter name of Wi-Fi network and password (once connected, you will only change if on a different network or hot spot (if applicable). Hit continue.

## Step 7

Use the camera on the Tyto Device to scan the barcode on the Amwell as shown.

**Next.** If this screen is not displayed automatically, press the red pairing icon, located in the upper right corner of the App and the Device pairing screen will be displayed.

## Step 8

Device will connect to Wi-Fi and show correct pairing once it is complete.

Complete intake instructions.  
Cost is \$20.
