

## Health Care Services available through Mohawk Industries

Mohawk is pleased to offer you, as a selected provider in My Medical Neighborhood, a variety of no-cost services for Mohawk health plan members.

### **Our Healthy Life Centers offer a complete line of services for your referral**

One of the greatest benefits to referring to a Healthy Life Center is that the providers will work directly with you, the primary care physician, to coordinate care. If our members have a procedure, screening or bloodwork done at a Healthy Life Center, we will send the results to you.

This collaboration of care ensures a seamless transition between the care provided at the Healthy Life Centers and the primary care provider.

### **Bilingual providers**

- Many of the Healthy Life Centers have bilingual health care professionals that are ready to take care of you and your family members

### **Pediatrics age 2 and up**

- Most Healthy Life Centers offer some pediatric services. They can treat uncomplicated acute illnesses, non-emergency asthma cases, cold and fever treatments. We offer referral to pediatricians in My Medical Neighborhood. They do not provide vaccinations or services for children under that age of 2.

### **Chronic condition management**

The Healthy Life Team offered through Cigna as part of our Healthy Life Centers can service as an extension of your office. We offer chronic condition management, health and wellness coaching, EAP-Employee Assistance Programs, pre-and post-admissions coaching, case management, specialty case management, Mohawk's maternity health program, lab screens and nutrition coaching.

- Chronic condition management
- Diabetes, high blood pressure, sample medications
- Monitor blood work

### **Coaching**

Because the Healthy Life Centers are conveniently located to our facilities, we can bring members back weekly, even daily if needed to monitor parts of a chronic condition.
